ABOUT THIS EVENT

This two-day training workshop provides a comprehensive review of the **NFPA 70B Standard for Electrical Equipment Maintenance** and the **NFPA 70E Standard for Electrical Safety in the Workplace**.

PowerSafe Consulting is proud to present this event hosted by **Badger State Consulting**, a Wisconsin-based safety and compliance partner.

DAY 1 – October 15, 2026

NFPA 70B: Electrical Equipment Maintenance (2026 Edition)

COURSE OVERVIEW

This session focuses on establishing and maintaining a compliant Electrical Maintenance Program (EMP) to reduce electrical incidents, improve equipment reliability, and support NFPA 70B safety requirements.

KEY LEARNING OBJECTIVES

- Identify the purpose and structure of NFPA 70B
- Understand how maintenance reduces electrical injuries and downtime
- Develop electrical equipment maintenance schedules and task lists
- Establish a condition of maintenance that supports NFPA 70B compliance
- Navigate the steps to build a facility-specific Electrical Maintenance Program
- Apply EMP concepts through practical exercises and activities

DAY 2 – October 16, 2026

NFPA 70E: Electrical Safety in the Workplace (2027 Edition)

COURSE OVERVIEW

This session covers electrical safety programs, energized work requirements, PPE selection, hazard analysis, and the responsibilities of employers and qualified workers.

KEY LEARNING OBJECTIVES

- Identify the scope, purpose, and structure of NFPA 70E
- Differentiate employer and employee electrical safety responsibilities
- Examine the components of an electrical safety program
- Understand qualified person requirements
- Establish an electrically safe work condition
- Determine when energized work is permitted
- Select appropriate PPE based on equipment and task
- Identify when an energized electrical work permit is required
- Review safety-related maintenance requirements for electrical equipment
- Understand electrical safety requirements for special equipment
